Specifications of TJ Peanuts :-

TJ Peanuts are smaller than those of the bold types. The shell is thicker than in the case of the peanuts types but thinner than that of the bold types. The kernels are big in size, oval in shape and are covered with light, red-coloured skin, darkening with age.

India is the second biggest producer of groundnut in the World. India and China produces about 2/3rds of total peanuts production of the World. Annual production of TJ Peanuts in India exceed 6 million metric tonnes. 70% of the winter crop is the bold variety and 85% of the summer crop is Java variety.

TJ Peanuts that are packed with minerals such as potassium, manganese, iron, copper and zinc, which energizes body and prevents from diseases. With the least moistured and the least aflatoxin levels, our peanuts meet the international quality standards. The oil content in a peanut is far greater than any other oilseed. It is also rich in carbohydrate content.
